SteelEye
TECHNOLOGY INC

August 13, 2010

Dear Hiring Manager:

SteelEye Technology employed Alan Partis as a Senior Software Engineer in our Lexington, South Carolina Engineering Team from April 2008 through August 2010. He was responsible for architecting, coding, testing, and releasing new features and enhancements to our Windows product, DataKeeper. Alan was also responsible for designing and coding several key infrastructure components that are utilized by both our Windows and Linux products.

I highly recommend Alan for any software architect and product development position. Alan would be a tremendous asset for your company and has my highest recommendation. Alan is a very intelligent, thoughtful and motivated individual. He is more than capable of excelling at any task that is asked of him.

Alan integrated easily into SteelEye's Engineering Team and gained respect from fellow engineers quickly. Also, he works well independently and requires minimal supervision. He identifies areas that need attention and prioritizes assignments correctly. Alan's communication skills are stellar, and he is very adept at describing complex designs to others in terms that can be easily comprehended.

If you have any further questions with regards to Alan's background or qualifications, please do not hesitate to call me.

Sincerely,

Nella Bishop
VP, Engineering
SteelEye Technology, Inc.
